Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: X, V, 16a, 16b, 16a', 16b', 16c, 16d. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: on page 6, line 11, "24bs" should be --24b--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3612

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-6, 8, 9-13 and 15-18 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Evans (US 2005/0017520 with an effective filing date of July 22, 2003).

Claim Rejections - 35 USC § 103

5. Claims 7, 14, and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Evans.

Evans discloses the component of claims 1-6, 8-13 and 15-18. Evans does not disclose that the sections are made of different materials. The Examiner takes Official Notice that it is known in the art to use multiple materials for vehicle parts and it is well known to use multiple materials in plastic and metal forming. It would have been obvious to one of ordinary skill in the art at the time of the invention to use different materials for the different component sections, since it has been held to be within the general skill of a worker in the art to use known materials on the basis of its suitability as a matter of mechanical expedient. The motivation would have been to provide the best material for the different sections which would reduce the weight of the end component (because lighter weight could be used for one section when a heavier material is needed for another section).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art discloses other end sections for vehicles.
